

Replication Package

Teshome K. Deressa, David I. Stern, Jaco Vangronsveld, Jan Minx, Sebastien Lizin,
Robert Malina, Stephan B. Bruns

May 1, 2026

Overview

This is the replication package of “*Low statistical power and overrepresentation of statistically significant findings in the environmental sciences*” (including the Supporting Information).

Data

The “data” folder contains the data sets as .xlsx file.

Codes and functions

All R codes and helper functions can be found in the folder “Scripts”.

- Run “scripts/classification.R” to classify meta-analyses into subfields.
- Run “scripts/main.R” to reproduce tables and figures reported in the main paper and supplementary information with the help of the functions in “scripts/functions.R”.
- All results are saved in the “results” folder. More specifically:
 - main results are saved in the folder “results/main/”.
 - Robustness check results are saved in the folder “results/robustness/”.
